Education

Rajiv Gandhi Institute of Petroleum Technology (RGIPT)

Expected graduation: May 2026

B.Tech in Computer Science and Engineering

- **Current CPI: 9.09/10**
- **Relevant Coursework :** *Data Structures and Algorithms (C++), Operating Systems, Machine Learning, Web Development, Operating System, Computer Networks, Data Handling And Visualization, AI/ML, Deep Learning*

Achieved a top 2% nationwide rank in **JEE Advanced 2022**, one of India's most competitive engineering entrance exams.

Technical Skills

- **Languages:** C, C++, JavaScript, HTML, CSS
- **Frameworks/Libraries:** React.js, Node.js, Express, Redux, Tailwind CSS, Socket.io, WebRTC
- **Tools/Platforms:** Postman, MongoDB Atlas, MySQL, Firebase
- **APIs and Authentication:** REST APIs, JWT, WebSockets

Projects

Video Chat Application

[React](#) | [Node](#) | [Express](#) | [Socket.io](#) | [WebRTC](#) | [Tailwind](#) 

- Designed a real-time video chat system, reducing latency by 50% using **Socket.io** and **WebRTC**.
- Implemented peer-to-peer configuration with **signaling** and **negotiation** processes, for handling media efficiently.
- Added text-based chat alongside video calls using socket connection, increasing user engagement.
- Optimized React state management using **React Hooks**, reducing component re-render time by 30%.
- Crafted a responsive UI with **Tailwind CSS** for an intuitive interface.

Attendance System (Ongoing)

[MERN](#) | [Geolocation APIs](#) | [JWT](#) | [Cloudinary](#) 

- Built a **location-based attendance system** where each user has access to mark attendance from their own devices.
- Developed a secure backend using **MongoDB, Node.js, and Express**, reducing data retrieval time by 40%.
- Integrated a **face recognition model** for authentication and implemented the entire location-based validation logic.
- Created API endpoints for real-time attendance tracking, role-based teacher-student authentication, and attendance analytics.
- Ensured secure communication and data integrity using **JWT authentication** and optimized database queries for high efficiency.

Skip Ads Chrome Extension (Ongoing)

[MERN](#) | [Javascript](#) | [Webpack](#) 

- Engineered a **Chrome extension** to automatically detect and skip YouTube ads, enhancing the user experience.
- Designed an event-driven **content script** leveraging **JavaScript** and **DOM manipulation** for real-time ad detection.
- Implemented a **mutation observer** to track DOM changes efficiently and trigger ad-skip actions dynamically.
- Optimized event dispatching mechanisms to **bypass YouTube's interaction restrictions** and ensure **seamless automation** (In progress).
- Integrated **manifest v3** best practices, enhancing security, background script efficiency, and browser compatibility.

Business Website

[MERN](#) | [JWT](#) | [bcrypt](#) | [Redux](#) 

- Established a full-stack e-Commerce platform for a wholesale company, enhancing their online presence and automating order management.
- Implemented **CRUD operations** for product and order management, improving operational efficiency by 35%.
- Integrated **JWT and bcrypt** for secure authentication and user login, ensuring data protection.
- Utilized **React Hooks** and **Redux** for state management, optimizing user interaction and navigation.

Achievements

- **Solved 350+ LeetCode problems** ([Profile](#)), strengthening data structures and algorithms, improving problem solving efficiency with 65-70% acceptance rate.
- Presented a collaborative [Project](#) on **Olympic Data Analysis and Visualization** to the audience, showcasing in-depth insights, trends, and interactive visual representations of historical Olympic data.

Other Experience

- **Assigned as Teaching Assistant**, leading interactive lectures for large audiences, effectively simplifying complex concepts and fostering a deeper understanding to **Linear Algebra, Calculus**, and **Numerical Methods** showcasing the **communication** efficiency, deep comprehension and **proficient delivery** skills.
- Encouraged students' confidence in applying theoretical knowledge to **Machine Learning** and collaborated with faculty to refine instructional strategies, demonstrating strong **leadership** and **presentation** skills.
